GATE 2023 BM.48: The function $f(z) = \frac{1}{z-1}$ of a complex variable z on a closed contour in an anti-clockwise direction. For which of the following contours, does this integral have a non-zero value? (A)|z-2| = 0.01

$$(B)|z-1| = 0.1$$

$$(C)|z-3|=5$$

$$(D)|z|=2$$

Solution:

Cauchy's Integral Formula and Residue Theorem.

$$\oint f(z) = 2\pi j Res [f(z), z_0] \tag{1}$$

$$Res[f(z), z_0] = \lim_{z \to z_0} [(z - z_0) f(z)]$$
 (2)

Here z_0 is pole of the f(z) Using (1)

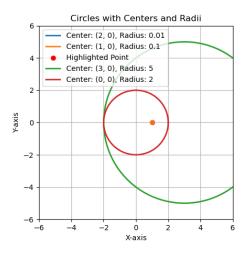

Fig. 0. graphs of all the given contours

$$\oint_{c} \frac{1}{z-1} dz = 2\pi j Res \left[\frac{1}{z-1}, 1 \right]$$
 (3)

For option A the pole is outside the contour, then Residue is zero.

$$\implies \oint_{c} \frac{1}{z - 1} dz = 2\pi j(0) \tag{4}$$

$$\Rightarrow 0$$
 (5)

For option B the pole is inside the contour. Then, using (2)

$$Res\left[\frac{1}{z-1}, 1\right] = \lim_{z \to 1} (z-1) \frac{1}{z-1}$$
 (6)

$$=1 \tag{7}$$

$$\implies \oint_C \frac{1}{z-1} dz = 2\pi j(1) \tag{8}$$

$$\implies 2\pi j \neq 0 \tag{9}$$

For option C the pole is inside the contour. Then, using (2)

$$Res\left[\frac{1}{z-1}, 1\right] = \lim_{z \to 1} (z-1) \frac{1}{z-1}$$
 (10)

$$=1 \tag{11}$$

$$\implies \oint_{c} \frac{1}{z-1} dz = 2\pi j(1) \tag{12}$$

$$\implies 2\pi j \neq 0$$
 (13)

For option D the pole is inside the contour. Then, using (2)

$$Res\left[\frac{1}{z-1}, 1\right] = \lim_{z \to 1} (z-1) \frac{1}{z-1}$$
 (14)

$$=1 \tag{15}$$

$$\implies \oint_{c} \frac{1}{z-1} dz = 2\pi j(1) \tag{16}$$

$$\implies 2\pi j \neq 0 \tag{17}$$

We can conclude that for options B,C,D contours have the non-zero value for this integral.
